PROFESSIONAL SUMMARY

Software Engineering student with strong foundations in Data Structures and web development. Experienced in building RESTful applications using Node.js, React.js and MySQL/MongoDB. Strong understanding of Software Development Lifecycle, debugging, and system design with interest in building secure and scalable systems.

EDUCATION

Bachelor of Engineering (B.E.), Computer Science and Engineering, Chitkara University 2023 – 2027
Punjab, India
CGPA: 8.27 | Data Structures & Algorithms (DSA), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks, OOP

Projects

Budget Tracker – Full Stack MERN Application 🔗, *MongoDB, Express.js, React, Node.js, JWT, MongoDB Atlas*

- Designed secure backend architecture with JWT authentication, OTP email verification, and middleware-protected REST APIs for budget and expense management.
- Deployed production-ready application on Render with MongoDB Atlas, implementing modular structure and environment-based configuration.

Hospital Management System 🔗, *Node.js, Express.js, MongoDB*

- Developed scalable service layer for managing patient records, doctor profiles, and appointment scheduling using REST-based architecture and modular structure.
- Structured MongoDB data models with validation checks and robust error handling to ensure consistent, secure, and reliable system operations.

Library Management System 🔗, *Node.js, Express.js, MongoDB*

- Built REST-based backend for managing book inventory and user workflows using modular routing and structured controller separation.
- Optimized MongoDB schema with validation and efficient query handling, supported by API testing and Git-based version control.

Expense Tracker – CLI-Based Microservices Application 🔗, *Java, Spring Boot, MySQL, REST APIs*

- Architected CLI-based expense management system using Spring Boot with microservices architecture and RESTful APIs for modular income and expense handling.
- Structured MySQL schema with authentication, validation, and structured exception handling to ensure reliable and secure data processing.

TECHNICAL SKILLS

Programming: JavaScript, Java, C++, SQL

Backend: Node.js, Express.js, RESTful APIs, Spring Boot

Database: MongoDB, MySQL

Frontend: React.js, HTML, CSS

Software Engineering: Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks

Tools & Platforms: Git, Postman, MySQL Workbench, AWS (EC2, S3, VPC, Security Groups)
